How to set up Player on Android TV

Enable ADB debugging

1. Go to Settings - System - Developer options - enable ADB debugging

Get the IP address of device

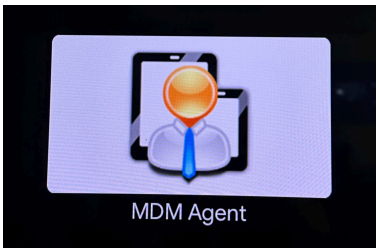

2. Settings - Network and Internet - Network Status - get the IP address

Execute commands

curl -L -o hmdm-6.24-master.apk
https://androidmdm.impressbox.eu/files/hmdm-6.24-master.apk

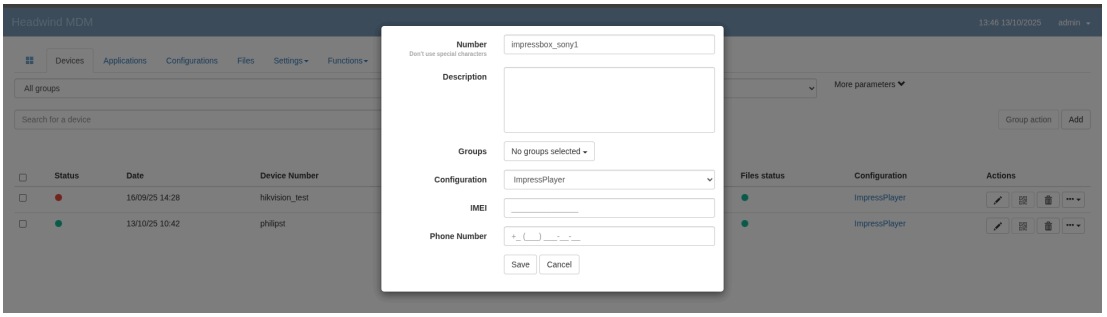

adb connect <ip address>:5555
adb install -r -g ./hmdm-6.24-master.apk
adb shell dpm set-device-owner com.hmdm.launcher/.AdminReceiver

Open MDM Agent in the Apps

Configuration MDM Agent:

1. https://androidmdm.impressbox.eu
2. Get device ID from the site https://androidmdm.impressbox.eu (login) and press “Add” to add new device. Then in field “Number” enter Device ID that will have this device. And choose “Configuration” - ImpressPlayer. Press “Save”.

3. Insert that Device Number from the site on the TV.

Adding device to m.impressbox.eu

1. Login to your account, and use this 6-digit code to add this device to management system.
