Samsung TIZEN

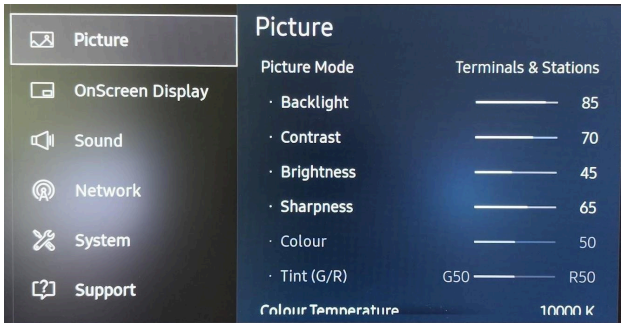

How To Install ImpressBox App

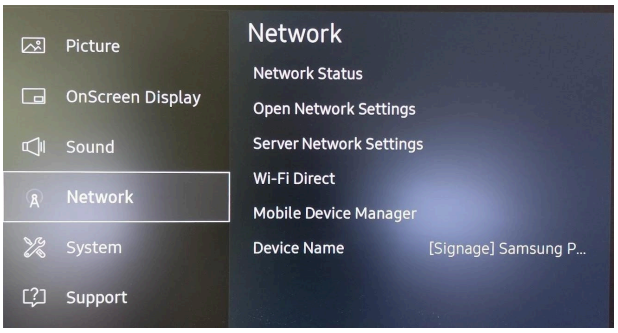

1. Network setup

Connect the TV to the power supply. Turn on the TV using the **red power button** on the remote control.

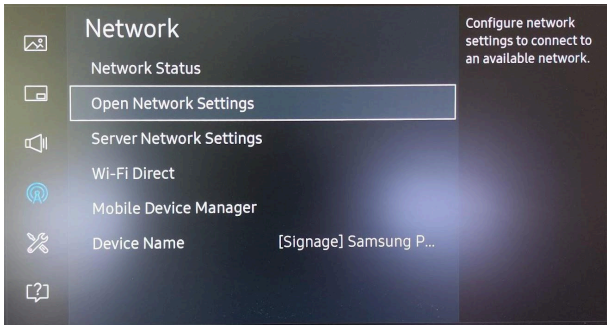

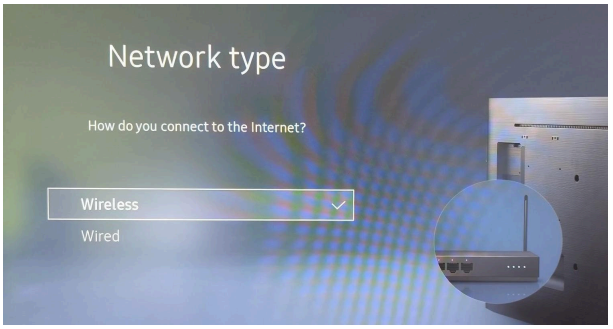

Using the remote control, please press the **MENU** button. Then, select the **Network** option.

Select **Open Network Settings** option.

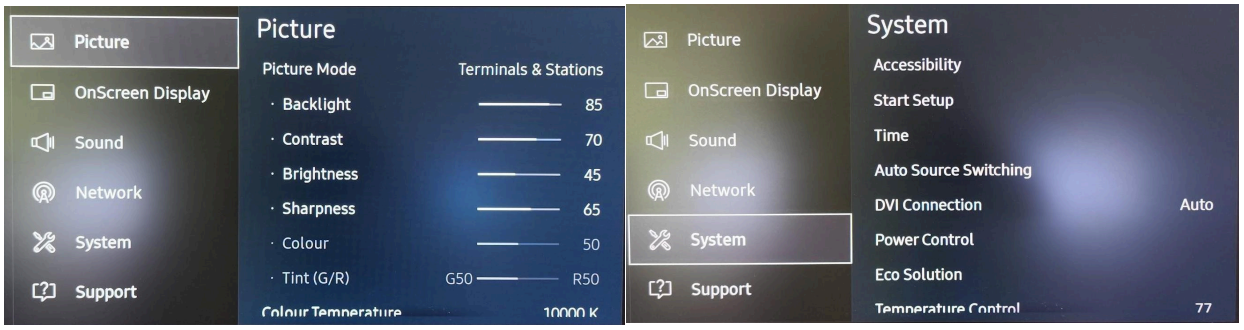

Depending on how you plan to connect to the internet, select either the **Wired** or **Wireless** menu option.

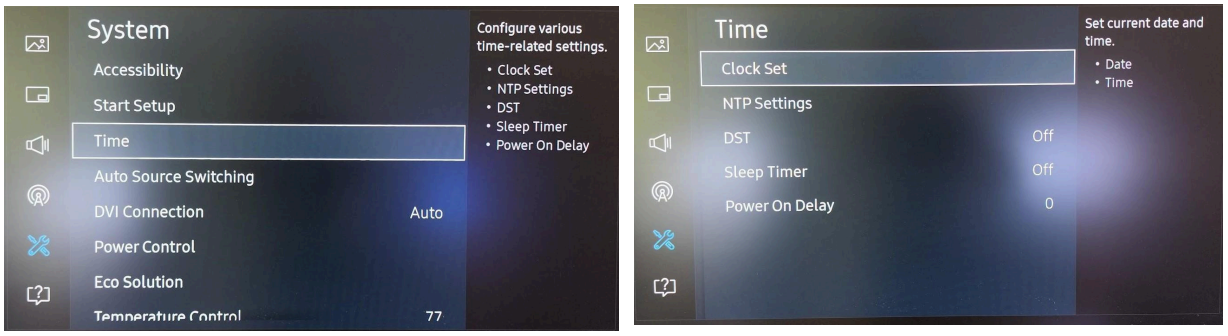

If needed, and if you've received IP addresses, you can enter them after selecting the **Wired** option.

2. Time and date setup

Using the remote control, please press the **RETURN** or **MENU** button to return to the main menu and select **System** option

Select **Time** option than **Clock Set**

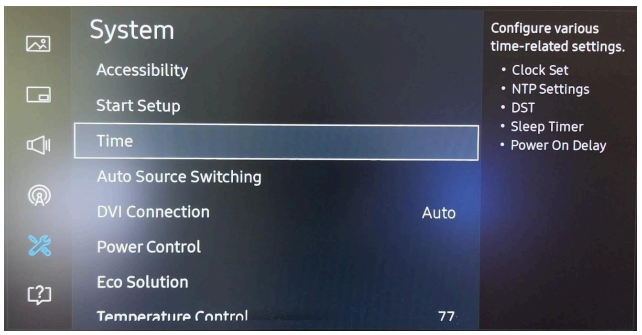

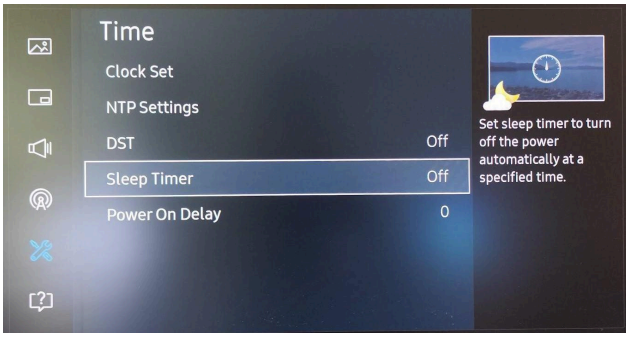

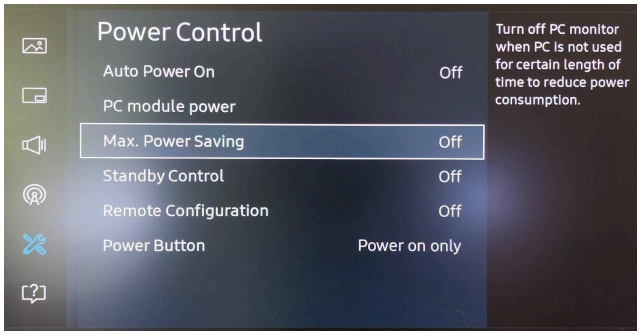

After selecting **Date** and **Time**, it is important to enter the correct current date and time.

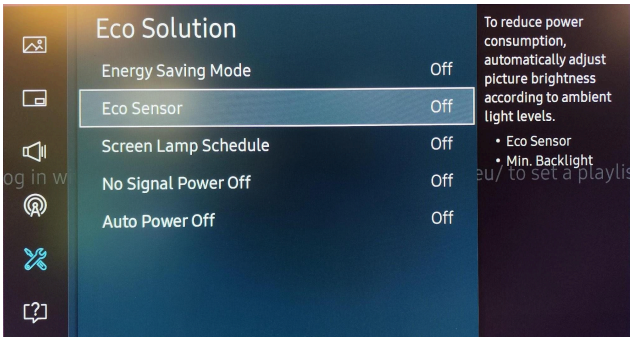

3. Power saving setup

Using the remote control, press the **RETURN** or **MENU** button to go back to the main menu. Select the
System option, then choose the **Time** option, and finally select **Sleep Timer**.

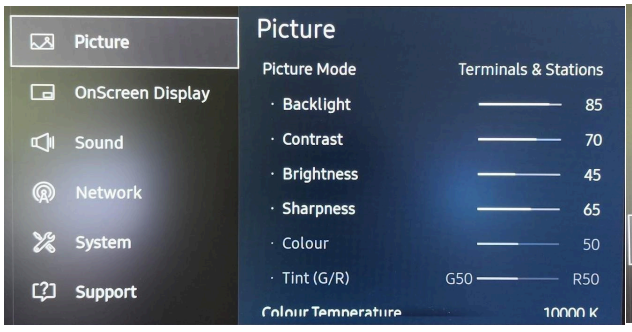

In the **Power Control** and **Eco Solution** menu, all settings must be turned **Off**.

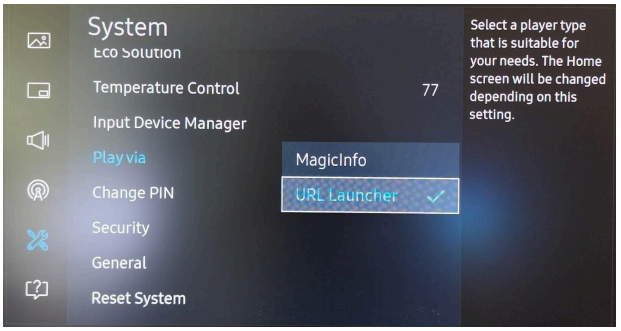

4. URL Launcher activation

Using the remote control, please press the **RETURN** or **MENU** button to return to the main menu and select **System** option, select **Play via** option**.**

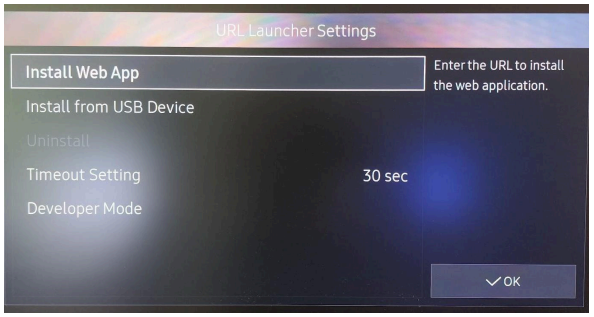

From the drop-down menu, choose **URL Launcher**.

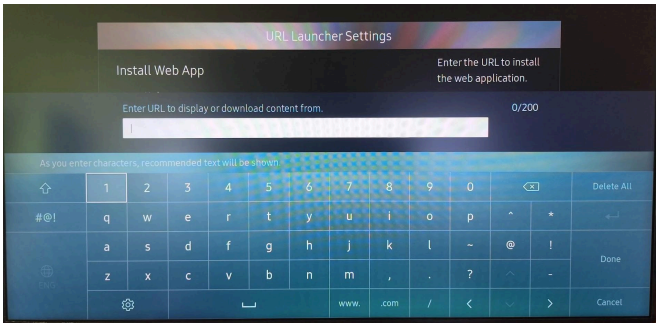

5. ImpressBox application installation

Using the remote control, please press the **HOME** button. Then, select the **URL Louncher settings**.

Select the **URL Louncher settings**.

Depending on the TIZEN update version, different URL addresses need to be entered. Below are listed the addresses in the order they should be entered if the initially entered URL is not suitable:
https://samsung.impressbox.eu
http://samsung.impressbox.eu
https://s.impressbox.eu
http://su.impressbox.eu

After installation, the program will start automatically. The first time it launches, it will display a QR code, the connection code, and the serial TV number. These are needed to connect the TV to the system.

After connecting the TV to the Impressbox system and when the display starts showing content, press the **blue button** on the remote control and take a photo.
